B Height Adjustment Range

C Setup Procedure

D Ergonomic Guidelines

Ergonomists recommend that the optimal position of your screen should be slightly below eye level. When looking at the screen's centre the user should have a downward visual angle of approximately 10-20 degrees.

For visual comfort while using your notebook computer, a viewing distance between 500mm (20") to 750mm (29½") is recommended.

Note: Use of this product should only be done in conjunction with an external keyboard and mouse!
