FOR A4 FORMAT

THE QUIET
ACHIEVER

ECOSYS®

Compact, efficient and highly economincal, the FS-1061DN is the ideal printer for small and home offices. This quiet black and white provides users with up to 25 pages per minute, paper saving duplex printing and connects easily to any PC with a standard USB interface. Robust and reliable, with Kyocera's proven ECOSYS long-life technology, the FS-1061DN is a hassle-free printer you can depend on.

› Up to 25 pages per minute in A4
› 250-sheet universal cassette and manual feed
› USB and network connectivity as standard
› Automatic duplex printing capability
› Very compact size and footprint
› Low-noise printing, with Quiet Mode function
› Highly reliable thanks to long-life components
› Exceptionally low printing costs for its class

ECOSYS stands for ECOlogy, ECOnomy and SYStem-printing. With long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly, and the drum units every 100,000 pages. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

PRESCRIBE IIc

With the Kyocera page design and control language PRESCRIBE IIc, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KYOCERA NetViewer

The KYOCERA NetViewer enables complete monitoring and control of all ECOSYS printers and digital Kyocera multifunction units from any Windows© PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Centre

The Status Monitor shows the current printers condition and gives direct access to the Command Centre for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).
