HP Rechargeable Active Pen G3 (6SG43AA)

Active as of 26/06/2019

Overview

Take your inspiration straight to your screen with the HP Rechargeable Active Pen G3¹, the digital pen designed for natural onscreen note-taking, drawing, and app navigation. And it's easier than ever to keep track of, with a built-in magnetic attach capability.²

Take the pressure off digital inking

Reduce the force required to use your pen when writing, drawing onscreen or working with your touch applications with improved starting and inking pressure vs. the previous generation.

Never miss a note with a rechargeable battery

Keep working and creating with a pen that's rechargeable through your device's¹ USB-C™ adapter or the included USB-C™ to USB-A cable. LEDs cue you on charging status.

Quickly launch apps and shortcuts

Customize button functions and shortcuts with the included software.³ Launch an app with a programmable Bluetooth® feature⁴ that pairs with frequently-used productivity apps. A digital proximity alert notifies you if you leave your pen behind.

Easy to use

Once your device¹ is paired and in range, it detects the pen and cues you where to place it onscreen. Erase, highlight, and click on your content with the two convenient side buttons.
